AUTOMATION +
POSITIONING TECH

- Advanced 3D photorealistic point cloud rendering
- Simplifies point cloud management, making it more efficient
- Automated unmanned processing
- Automated removal of the dynamic objects and the shifting fridge objects
- AI-Sight: human detection and automated blurring features
- Reality image floor filling
- Control points can be used to coordinate the registration and transformation of data, hence increasing accuracy.
- Multiple datasets processed in parallel, completed overnight
- 24/7 site accessibility and seamless collaboration with others
- Global coordinate system support
- Able to process and register data on any device
- Project cost transparency for budgeting and business strategy

- 6 minutes - 600 sqm area
- 6 mm - 500 sqm relative accuracy
- Equally accurate as TLS
- No more missed scans
- Easy and fast setup
- One-man operation capable
- Floor-by-floor transition enabled
- Versatile environment application
- Survey-grade results and registration
- Ground and wall control point support
- 3 hours non-stop with hot-swappable 2 pairs of batteries
- 600,000 pts/sec
- 2 x LiDARs, 16-layer eye-safe laser
- 903 nm wavelength, 100 m radius range
- 4-Dimensional, 20 MP HDR fisheye camera
- Fixed focus
- 1 TB SSD storage

RM3XX,XXX with 10% discount for LJT Subsidy, limited unit only!!

Package include:

- NavVis VLX 2 Start Kit
- NavVis System Software Updates 3 years
- NavVis Processing-5 (Approx. 500,000sqm indoor, more for outdoor)
- NavVis IVION Core 25 (Hosting data up to 150GB)
- NavVis 1st Year Support

- NavVis Academy User Platform
- Physical training by NavVis & Aptella
- Training Certificate provided

With NavVis VLX, it enhances the value of your data and expands your commercial options.
